

Painting with Petals

Many artists have been inspired by the colours of the natural world in their artwork. Some have even gone further and have included actual flowers, leaves and twigs in their pieces!

Why not make your own 3D natural artwork?

Go for a walk in nature or explore your garden and pick up leaves, petals and twigs that catch your eye.

Once you've collected enough pieces, it's time to get creative. Assemble the petals and leaves to make a picture, a shape or even a word!

HANDY HINT!

Always ask permission before you pick any plants – some places won't allow you to pick flowers as they are rare or the land is protected!

We'd love to see your natural works of art. You can share them with us at:
